

## **Safety Training at Conferences, Malls, Airports, Docks, Public Places**

Issues involved in safety at public places are very complex due to following reasons ...

- ?? Multiple Entrances: Normally public places have multiple entrances. Apart from the entrances from the main roads there can be entrance from the parking.
- ?? Non-homogeneous type of crowd: The types of individuals visiting public places are varied. Individuals from various social, economical, linguistic strata are visiting the public places.
- ?? Uneven flow of visitors: The visitor flows can vary drastically on public holidays whereas on weekdays and office hours the visitor flows are moderate.
- ?? Safety Training Needs: The safety training needs in public places are not very comprehensive; normally the training is about evacuation in case of a fire and unidentifiable bags etc.

Safety training at public places using STK ..

Safety training can be effectively managed by placing STK – Safety Training KIOSK at strategic locations within these public places.

Specifications of the KIOSK :

- ?? Attractive Design from a Safety point of view : STK is designed in such a manner that it does not look like a computer and hence everyone is encouraged to use the same.
- ?? Touch Screen : The system is designed using a touch screen based system which makes the entire operations relatively simple.
- ?? Audio Video Support : The system can also give support using an audio-video system , this makes the user interaction interesting.
- ?? Support for hearing impaired individuals : Support is available for the hearing impaired individuals.

Locations of Safety Training KIOSK : The safety training at public places can be handled by placing the STK – Safety Training Kiosk at strategic locations in the public places. These locations can be various entrances of the premises, high visibility places, queue formation locations, outside rest rooms etc.

Training Program : The training program is very simple but with lot of multi-media, which comprises of

- ?? Do's & Don'ts
- ?? Evacuation Maps
- ?? Emergency Contact Details

Benefits : As discussed in this white paper the safety training at public places has its own challenges but with a system like STK – Safety Training KIOSK , effective training can be provided at public places with minimum investments.
